ELECTRO™ POWDERCOAT RANGE

the electro 2 look

Unlike traditional anodic deposition finishes which are restricted to aluminium, architects, designers, and colour consultants will love the flexibility and freedom the Electro™ range palette of colours offers. With relative ease, Electro™ powder coatings can be applied to a wide variety of substrates such as aluminium, steel, and galvanised metal, making perfect colour co-ordination possible across many different construction elements, fixtures, and fittings.

The sophisticated technology behind the Electro[™] range palette of colours, ensures unparalleled colour consistency on application, eliminating "mix and match" fabrication issues that are common with traditional anodic finishes. The unique Electro[™] powder coating technology also makes it possible to have an extended range of colours beyond what has been traditionally available.

For the traditionalists who like the tried and proven, the popular colour shades of Silver Reign, Medium Bronze, Sensational Champagne, Dark Bronze, Fresh Gold and Black Ace are all an integral part of the Electro[™] range colour palette.

For the modernists however who are lc for something fresh and new, the Elect range palette of colours has been exter include the camelions Poyple and Blue brights Blueit, FRed, Canary and Brigh and the subtleties of Tiberius, Green La Blue Night, Clean Linen and Flat White new "Electro™ Look" fashion colours h been specifically selected and are desig to enhance modern building styles, and complement modern internal decoration

In addition to the ex-stock Electro[™] rar palette of colours, made to order shade also possible. Please contact us with yo request.

earth friendly

No liquid chemicals, solvents, or caustic solutions are used in the manufacture of the Electro™ range of powder coatings. Electro[™] powder coatings have a negligible VOC content. They are PVC free, formaldehyde free, heavy metal free, TGIC free, and they are recyclable. Electro™ powder coatings have an extremely low impact on humans, animals, and the environment.

reen building council australia

guaranteed to last

Made from high durability, UV resistant raw materials, the tough yet flexible Electro™ range of powder coatings, when applied by a "registered applicator" on architectural aluminium, can carry a 20 year, exterior durability, performance warranty. The Electro[™] range of powder coatings are suitable for use in a wide variety of climatic conditions from cold to hot, and humid to dry environments.

Besides their excellent exterior durability, compared to traditional anodic type finishes, the Electro[™] range of powder coatings have superior anti-staining properties. The Electro™ range of powder coatings are resistant to staining from the likes of wood tannins, and can thus be used with confidence in conjunction with timbers such as cedar.

Mortar splashes cleaned off while still will not damage the Electro™ coated si or leave an ugly white stain.

In situations where "run off" marks ma and or air borne dust and dirt accumul simply wash with warm soapy water us car wash brush or similar. In the unfort situation where serious damage occurs Electro[™] coated surface the damage m easily repaired in-situ using an approve system. Please refer to the "Use and C brochure for more information.
